NEUROSCINT Project website has opened officially on November 24, 2005.

NEUROSCINT stands for NEUROSCIENCE INTEgration.

The purpose is to develop neural simulator which can estimate internal state of human through external measurement. We aim to develop neuroscience integration platform where vast amount of neuroscience knowledges are embedded.

The project is running as one of the PRESTO Program of Japan Science and Technology Agency since October 2004 (PI: Mihoko Otake).

Also, since April 2005, it is running as one of the SCINT Human Program of the University of Tokyo.
